OUR PEOPLE MAKE THE DIFFERENCE

We believe in building a quality product that will outlast and out perform any other *rolling stock* on the market.

Our expertise in all aspects of the baking industry gives us special insight into your needs.

It's the high standard and work ethic of our team members that have made our company an industry leader for over 30 years.

Located in the city of Irwindale in Los Angeles. Our 60,000 square foot plant offers a full range of services to meet the needs of today's baker.

Make a smart investment in the company that knows this industry from the inside out.

WE DON'T DO LOW QUALITY RACKS

Signs of a low quality rack:

- Low weight support
- Broken or bent slides
- Wheels that damage your floors

JUST SAY NO
to cheap frames and casters.

THE BEST RACK

We Guarantee: Industrial Quality • Long Lasting Frame • Fastest Delivery

Order our optional double welds on all slides for superior strength and we will guarantee these welds for life. Imagine...a rack with no broken welds...ever !

The second installment in our HEAVY DUTY LINE OF RACKS is our industrial, oversized red casters. Our casters support up to 3,200 lbs. It is this strength that keeps our rack rolling.

WELDS NEVER BREAK

Lastly our industrial base plate design takes all the weight off the welds, making this a LIFETIME rack frame... no broken welds ever...nothing else compares.

Stainless or Aluminum

All Standard Racks Include
These Exceptional Features:

Premium 16-Gauge Slides

Industrial Red Casters,
3200 lb. Load Capacity
